Windows users: Versions 0.24.0 and above of Solar come with a new installer on Windows. If you update from an older version, please uninstall your old Solar wallet first and then install the new version. Uninstalling will not delete your secret keys, your accounts will still be available.

Ensure device is secure and is not compromised through spyware which can steal your secret keys.

Be prepared to record your secret keys in writing.

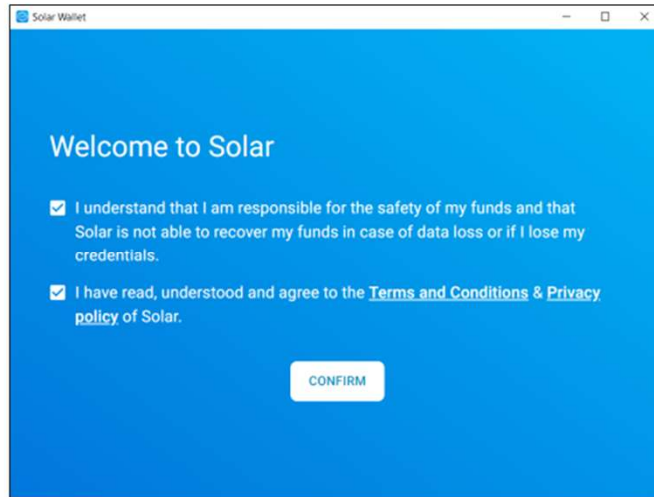

These slides show setting up wallets on a computer, but the mobile application is very similar.

Download Solar Wallet to computer, phone, or tablet. Download from [solarwallet.io](https://solarwallet.io)
