

GGHP TOKEN

EVERY GG AMPS YOUR HP!

GGHP utilizes the Stellar Lumens cryptocurrency network to provide awards to our gamers. It also educates them on cryptocurrency using a real digital currency with value that they can save, trade, and spend.

WHAT IS CRYPTO?

A cryptocurrency is a digital or virtual currency that is secured by cryptography, which makes it nearly impossible to counterfeit or double-spend. The advantages of cryptocurrencies include cheaper and faster money transfers and decentralized systems that do not collapse at a single point of failure.

WHAT IS GGHP TOKEN'S PURPOSE?

GGHP Tokens are trackable via a website that shows the total number of Tokens awarded by their coaches for a Good Game "GG". Their "HP" much like in a video game rises over time as they accrue more tokens. Additionally, as the value and acceptance of the token grows, we will explore using the GGHP token for prize purchases, bracket rewards for tournaments, and eventually accepting season payment using GGHP.

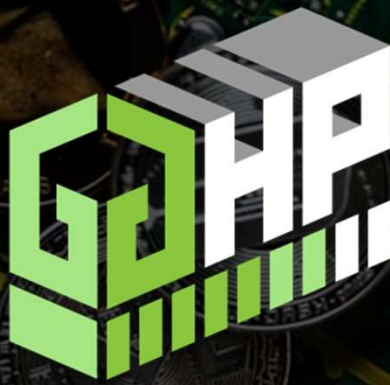

IS IT SAFE?

Sending cryptocurrency is a secure form of transaction using your Public Key. As long as you keep your Secret Key protected, no one should be able to access your gamer's wallet. Additionally, all transactions are public and trackable on the Stellar network. The public nature of all transactions adds to the security of the network.

HOW DO WE PARTICIPATE?

Every gamer gets a wallet. Every time a GGHP token is sent from the location wallet to your gamer's wallet, their total GGHP rewards will be displayed on the GGHP Token website.

GGHP tokens operate on the Stellar Lumens network and can be added to any Stellar compatible wallet. Once a wallet is open and funded with Stellar Lumen's native token (XLM), you must create a Trustline to receive and purchase GGHP.

DOWNLOAD COMPATIBLE WALLETS

Any Stellar Network Compatible Wallet will work. These could include Hardware Wallets or Software Wallets. We focus on Software Wallets since its easier for new users. Any of the following Software Wallets will work:

- Solar Wallet (recommended)
- Lobstr Wallet
- StellarPort Wallet
- Guarda Wallet
- Atomic Wallet

FUND WALLET WITH XLM

Every Wallet typically requires to be funded with at least 2 XLM to allow for adding other tokens to your wallet. Most wallets provide means by which they can be funded through bank or credit card. Alternatively, your location owner may also be able to send you the 2 XLM to activate your wallet.

ESTABLISH TRUSTLINE WITH GGHP

Part of the security measures of the Stellar Network is to require Trustlines between a wallet and any token they wish to transact. To accomplish this, add a Custom Token under Add Assets to your Account (typically under Assets menu). Since GGHP is relatively new, it is not typically found with a search, so you often have to add custom token. Enter the following information:

- **Code:**GGHP
- **Issuer:**GAK22PLYISQPB4RMYYLNRACKFXJ4
WSLUDEA3RWN7SWPYFBT36VBJNI4E

Once entered, then select TRUST. This should create a Trustline between your wallet and the GGHP Token. Once Trustline is establish you can Trade for and Purchase the GGHP Token.
